The 2018 Bond charts reflect an ongoing evaluation process and will be updated on a regular basis.

*The improvements are targeted for specific areas of the school in need of replacement. The areas of the parking lot, roof, etc. are identified through a preventative cycle that is based on the district's strategic, long-range facilities management program. More information on the areas targeted for improvements is available through the school office.

**Through careful management of bid awards, additional funding for facility improvements has been made available through the 2018 bond issue. Before addressing these additional improvements, priority has been placed on completion of project commitments made to voters for the 2018 election. The additional projects noted in these informational sheets are scheduled to be completed during the summer of 2024.
