

October 14, 2024

Hello,

Oakland University School of Nursing Community Health students will be at Collins Elementary School from October 22, 2024 through December 3, 2024. Student nurses will be working with the elementary school students to provide health education in the classroom. Student nurses plan on teaching health topics such as proper handwashing techniques, preventing the spread of germs, proper nutrition, and healthy choices. There will also be a focus on the importance of exercise and oral hygiene / brushing teeth. We look forward to working with the students in the upcoming weeks.

Sincerely,

Lori Ensign MSN, RN
Faculty Clinical Instructor
Oakland University School of Nursing
